BSCS – 6th semester

Web Dev - Lab

Lab #13

STEP 5 — Open WordPress Setup

Open in browser:

Local WordPress Setup

STEP 6 — Configure Database

Below you should enter your database connection details. If you are not sure about these, contact your host.

Database Name
The name of the database you want to use with WordPress.

Username
Your database username.

Password [Show](#)
Your database password.

Database Host
You should be able to get this info from your web host, if localhost does not work.

Table Prefix
If you want to run multiple WordPress installations in a single database, change this.

[Submit](#)

STEP 7 — Create Admin Account

Example:

Field	Value
Site Title	Lab 13
Username	admin
Password	@Rifaq.....
Email	rifaqajmalmohmand@gmail.com

- Install WordPress

Welcome to WordPress!
[Learn more about the 6.9.4 version.](#)

Author rich content with blocks and patterns
Block patterns are pre-configured block layouts. Use them to get inspired or create new pages in a flash.
[Add a new page](#)

Customize your entire site with block themes
Design everything on your site — from the header down to the footer, all using blocks and patterns.
[Open site editor](#)

Switch up your site's look & feel with Styles
Tweak your site, or give it a whole new look! Get creative — how about a new color palette or font?
[Edit styles](#)

Site Health Status
No information yet...
Site health checks will automatically run periodically to gather information about your site. You can also [visit the Site Health screen](#) to gather information about your site now.
