

STEP 1 — Creating Project

We'll Open Terminal And Run:

```
flutter create lab8_app  
cd lab8_app
```

Open the project in **Visual Studio Code**

STEP 2 — Replace

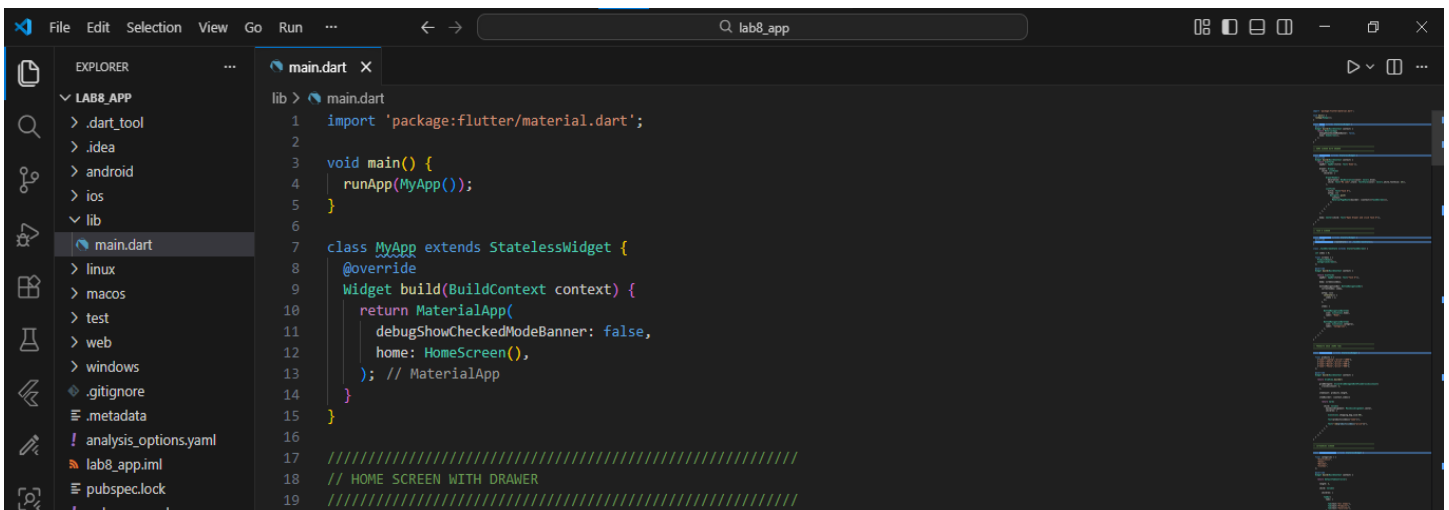

`lib/main.dart`

Open:

`lib/main.dart`

Delete everything and paste New Code

Code

```
20
21 class HomeScreen extends StatelessWidget {
22   @override
23   Widget build(BuildContext context) {
24     return Scaffold(
25       appBar: AppBar(title: Text('Home')),
26
27       drawer: Drawer(
28         child: ListView(
29           children: [
30
31             DrawerHeader(
32               decoration: BoxDecoration(color: Colors.blue),
33               child: Text("My Labs", style: TextStyle(color: Colors.white, fontSize: 24)),
34             ), // DrawerHeader
35
36             ListTile(
37               title: Text("Task 8"),
38               onTap: () {
39                 Navigator.push(
40                   context,
41                   MaterialPageRoute(builder: (context) => Task8Screen()),
42                 );
43               },
44             ), // ListTile
45           ], // ListView
46         ), // Drawer
47       ),
48     );
```

```
48
49     body: Center(child: Text("Open Drawer and click Task 8")),
50   ); // Scaffold
51 }
52
53
54 // TASK 8 SCREEN

}

```

STEP 3 — Run the App

In terminal:

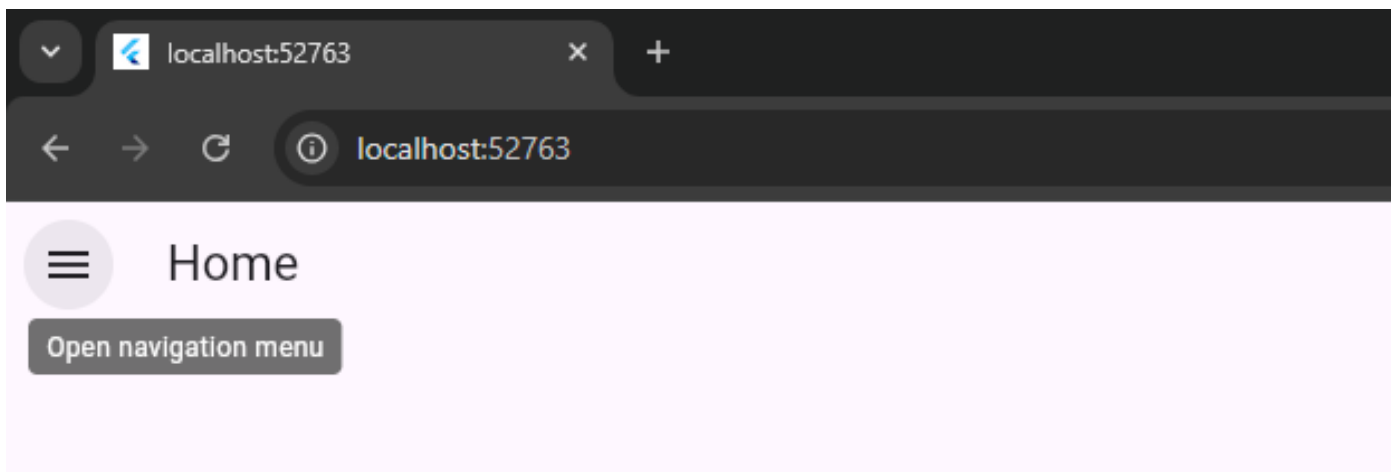

```
flutter run -d chrome
```

Result

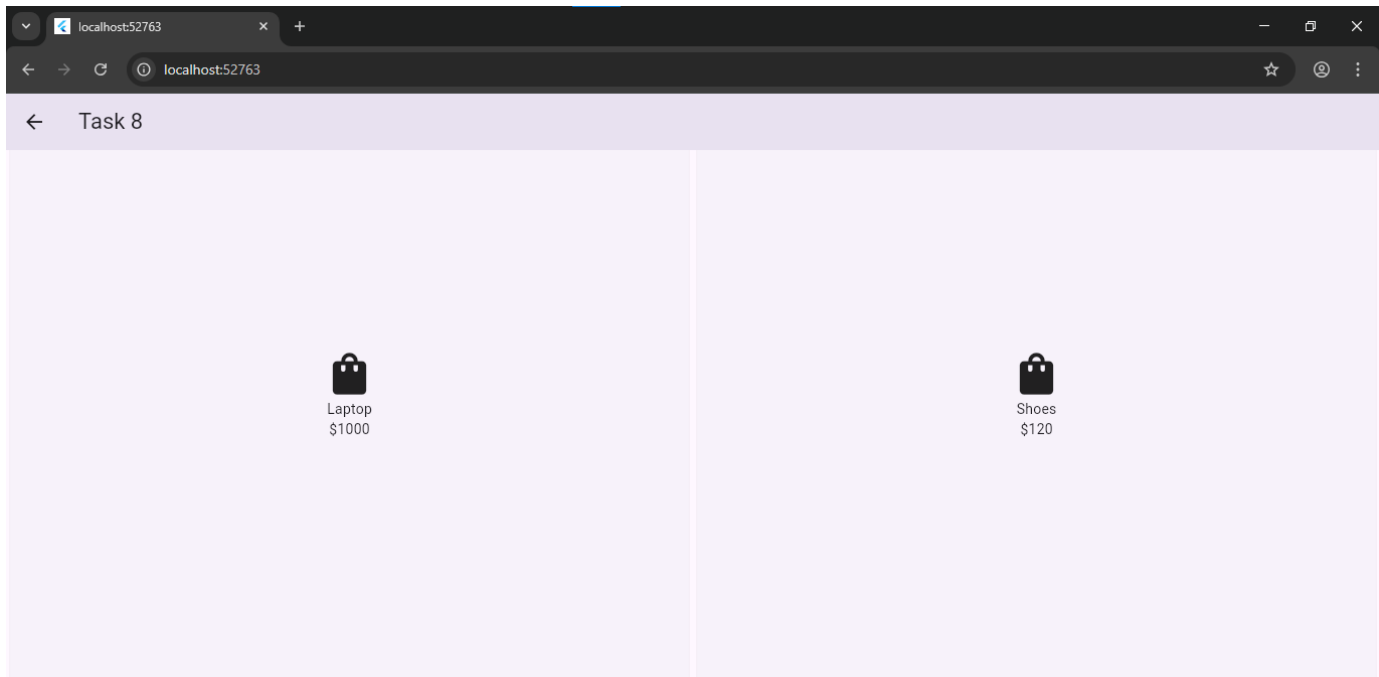

1. Drawer with Task 8

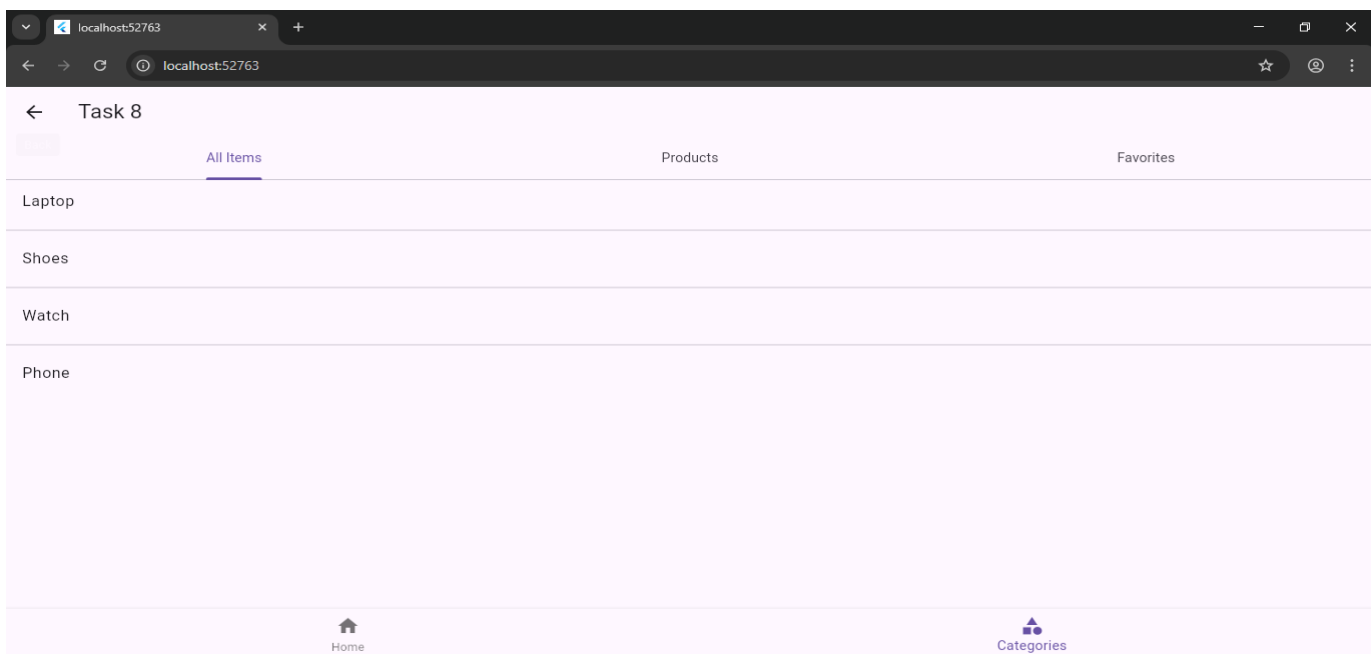

2. Bottom Navigation

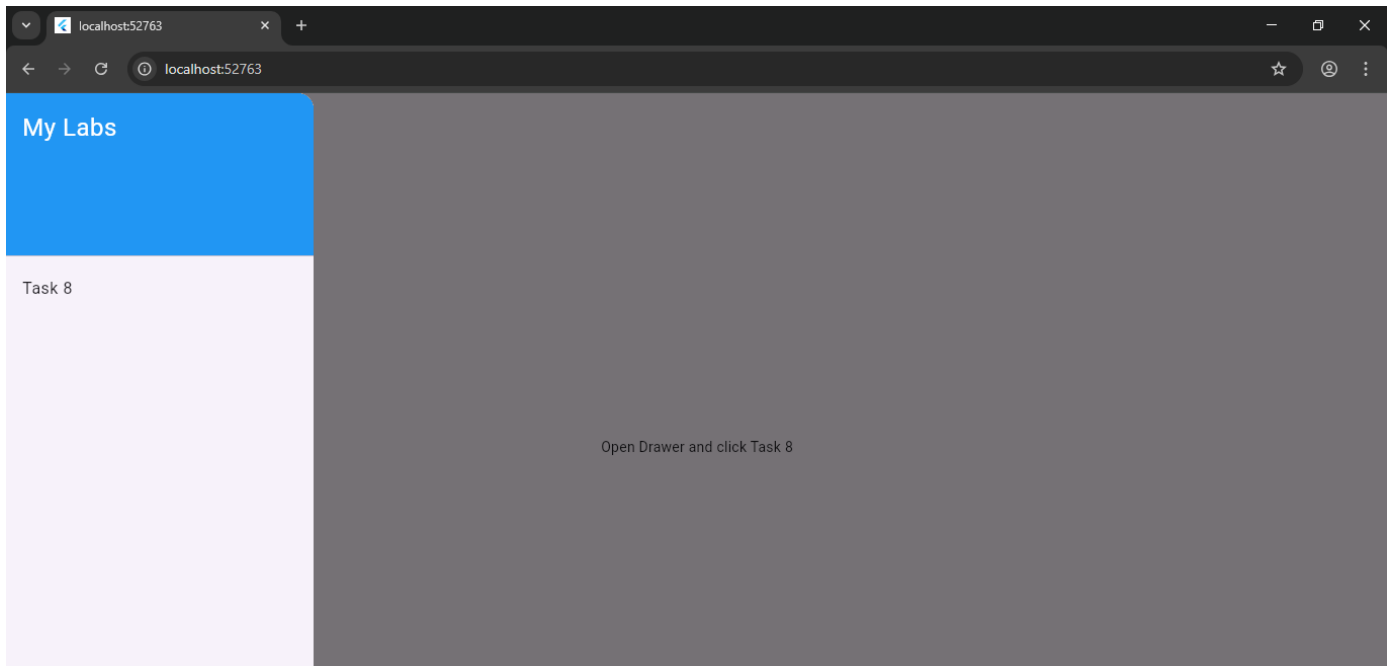

3. Product Grid

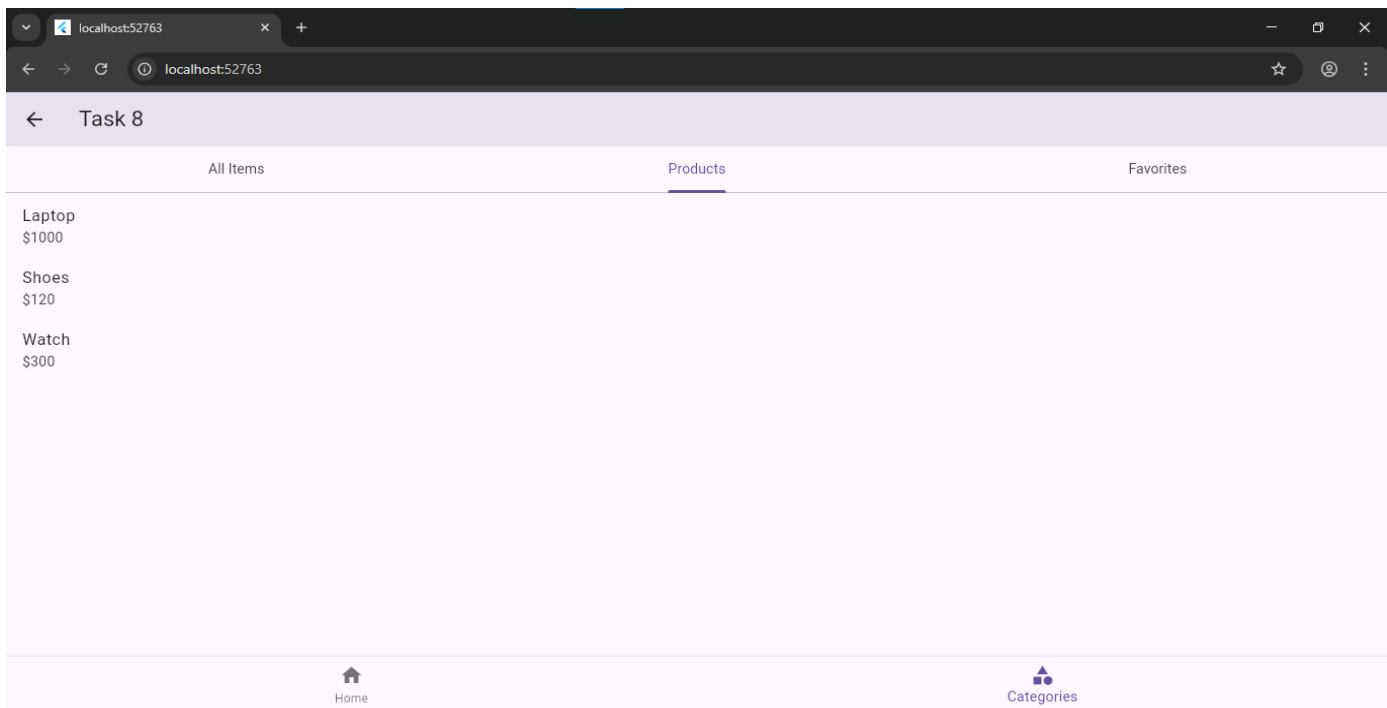

4. Categories Grid

5. Tab Bar

6. Product Detail Screen

7. Favourite Tab
